

Chapter 3 Scanning Networks

Network Scanning

- ping ipaddr
- fping -aqg cidr
- arping IP
- arp-scan cidr
- netdiscover -r , netdiscover -i interface -p

Angryip Installation:

<https://angryip.org/download/#linux>

Go with "x86 64-bit DEB Package for Ubuntu/Debian/Mint"

Open terminal

cd Downloads

sudo dpkg -i ipscan_3.9.1_amd64.deb

Go to Applications ----> Internet ----> Angry IP Scanner

In the tool ---> Get into preferences ---> Display ---> "Check Alive hosts only"

In the tool ---> Get into fetchers --> Drag Mac address and Mac vendor onto left hand side

Now initiate the scan using "Start"

- nmap (nmap.org)
- nmap -sn (iprange)
- Network Scan using Mobile phone (fing, portdriod)

Port Scanning

- nmap -sT
- nmap -sS
- nmap -sN
- nmap -sF
- nmap -sX
- nmap -sA
